

The program requirements for the Bachelor of Science degree with a major in **Data Analytics** are given below. A minimum of 65 credit hours are required for the major; a minimum of 50 credit hours are required for the GE and major prerequisites; a minimum of 129 total degree hours are required for graduation.

The Required Core courses follow a strict prerequisite structure. Some courses are only offered once per year. Failure to successfully enroll in and complete these courses *will* delay graduation.

General Education and College of Arts & Sciences Requirements

Students must satisfy the General Education requirements for the Bachelor of Science degree in the College of Arts and Sciences. Math 1151^d is required for the major core curriculum; it is suggested that students use this course to satisfy the category indicated in the table below. Students in the Data Analytics major satisfy the GE's embedded literacy requirements by taking Stat 3301 (embedded literacy in data analysis) and Stat 3302 (embedded literacies in advanced writing and technology).

GE Category ^e	Suggested Course	Category Credit Hours
Launch Seminar (GENED 1201)		1
F: Writing and Information Literacy		3
F: Mathematical and Quantitative Reasoning/Data Analysis	Math 1151 ^d (5 cr. hrs.)	3-5
F: Literary, Visual and Performing Arts		3
F: Historical and Cultural Studies		3
F: Natural Science		4-5
F: Social and Behavioral Sciences		3
F: Race, Ethnicity, and Gender Diversity		3
T: Citizenship for a Diverse and Just World		4-6
